FALL 2019 CONFERENCE

NOVEMBER 19 - 20, 2019 | HALIFAX, NOVA SCOTIA

11:00-11:45am

Achieving Sustainable Wealth

TE Wealth

A significant amount of new wealth is being created within the Indigenous Community across Canada as a result of land and specific claim settlements, resource sharing opportunities, economic development initiatives and other revenue generating sources. This accumulation of wealth is placing tremendous responsibility and certain challenges upon leadership to prudently manage such wealth while also balancing the needs of today with that of the future.

Decisions surrounding the use of income and capital together with per capita distributions; to borrow or not to borrow; are all just a few of the challenges to be discussed. Participants will be presented with a series of financial concepts and best practices in the planning, implementation and oversight of an effective and sustainable community investment strategy.

11:45am-12:00pm

Conference Wrap Up, Closing Remarks by Chair

Debbie Christmas

12:00-1:00pm

Lunch
